- **Diploma in Computer Software.**

PROJECTS

I.T Infrastructure, ERP & other Projects:

I've been deeply engaged in managing various aspects of IT infrastructure, including security, hardware, software, networking, & other implementation & commercial requirements, ensuring alignment with the company's requirements. My responsibilities have also encompassed conducting thorough analyses & staying abreast of market trends to incorporate the latest technologies into our systems.

Project: ERP Software Implementation at MT Autocraft Group March 2022 – February 2025

Led the implementation of QAD & Evolve ERP systems across the MTA Group, with a focus on both technical infrastructure and software deployment.

Collaborated with third-party vendor 'M/s Aliter Business Solutions' to ensure smooth project execution.

Managed cloud hosting on Microsoft Azure, including secure connections from all plants via Tunnel technology.

Automated payment processes using local gateway servers in Windows environments with FTP protocols.

Streamlined gate entry documentation and attachment processes within the Evolve ERP system.

Customized customer barcode and QR code setups according to specific requirements.

Oversaw API integration between QAD & Evolve, aligning with business needs.

Finalized commercials and handled updates for new system requirements.

Project: Email Migration – Google Workspace at MT Autocraft Group January 2024

Role: Project Lead/Team Member

Led the migration of over 200 company email accounts from Basic to Standard Google Workspace, ensuring seamless data transfer and zero loss of emails.

Coordinated with internal teams and Google Workspace support to ensure smooth project execution.

Developed a detailed migration plan, including data backup, user communication, and post-migration support.

Managed troubleshooting and resolved issues promptly, maintaining minimal downtime during the transition.

Project: HRMS (Payroll) Software Implementation at MT Autocraft Pvt. Ltd.

November 2023 – July 2024 Role: I.T Coordinator

Collaborated with M/s Dexciss Technology Pvt. Ltd. for the successful implementation of HRMS/payroll software.

Data Management:

Facilitated migration by extracting and providing historical employee data from legacy systems, ensuring accuracy and completeness throughout the implementation process.

Oversaw smooth integration and successful implementation of the software, completing the project within specified timelines and budget constraints.

Commercial Negotiation:

Led negotiations with Dexciss on software costs, user licenses, and post-implementation support services, securing favorable terms for the organization.

Managed contract negotiations to optimize licensing fees and ensure long-term scalability, balancing cost efficiency with feature fulfillment.

Project: Acronis Cyber Protection Implementation at MT Autocraft Pvt. Ltd.

July 2023

Implemented Acronis Cyber Backup Cloud to protect over 150 systems across the organization.

Utilized advanced anti-ransomware technology to safeguard data and systems in various environments, including physical, virtualized, on-premises, and cloud setups.

Ensured comprehensive data protection across more than 20 platforms, enhancing overall cybersecurity posture.

Project: Digitization in Production at MT Autocraft Pvt. Ltd.

December 2023 – August 2024 Overview:

Implemented digitization across three plants: Parwanoo, Rohtak, & Barotiwala, enhancing production efficiency & data visibility.

Machines Involved:

Integrated various machines, including Induction Hardening, VMC, CNC, and others, into the digitization framework.

IoT Integration:

Deployed IoT devices such as sensors, actuators, and smart machines to collect real-time data on equipment performance, product quality, and environmental conditions.

Interconnectivity:

Leveraged Industry 4.0 principles to ensure seamless connectivity and communication between machines, systems, and personnel, enabling real-time monitoring, remote control, and enhanced collaboration across the production network.

ROLE & RESPONSIBILITY

- **Mail Management Hosting & Migration:** Oversaw the hosting and migration of email services to ensure smooth transitions with minimal disruption.
- **ISP/ILL Management:** Managed Internet Service Providers (ISP) and Internet Leased Lines (ILL) for optimal connectivity and performance.
- **Windows/Server Environment Management:** Administered Windows server environments, ensuring system stability and security.
- **ERP Implementation & Support:** Led ERP software implementation projects and provided ongoing support to users.

- IT Remote Support: Delivered remote IT support to troubleshoot and resolve user issues efficiently.
- Face Reader Machine Setup: Installed and configured face reader machines for MTA Group.

Cloud Platforms

- Gained hands-on experience with major cloud service providers, including Amazon Web Services (AWS) & Microsoft Azure.
- Implemented cloud storage, computing, and networking solutions to enhance scalable business process.
